

juce::Component

```
classDiagram
    class juceComponent["juce::Component"]
    class BrowserWindow
    BrowserWindow --|> juceComponent
```

The diagram shows a class hierarchy. At the top is a box for 'juce::Component' with two empty sections below the name. Below it is a box for 'BrowserWindow'. A blue arrow with an open triangle head points from the 'BrowserWindow' box up to the 'juce::Component' box, indicating inheritance.
