

juce::JUCEApplication

```
classDiagram
    class JUCEApplication["juce::JUCEApplication"]
    class GuiAppApplication
    GuiAppApplication --|> JUCEApplication
```

The diagram shows a class hierarchy. At the top is the base class 'juce::JUCEApplication', represented by a rectangle with three horizontal compartments. The top compartment contains the class name, while the other two are empty. Below it is the derived class 'GuiAppApplication', represented by a rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment is empty. The bottom compartment contains a list of public methods, each preceded by a '+' sign. A blue arrow with an open triangular head points from the top of the 'GuiAppApplication' class to the 'juce::JUCEApplication' class, indicating inheritance.

GuiAppApplication

- + GuiAppApplication()
- + getApplicationName()
- + getApplicationVersion()
- + moreThanOneInstanceAllowed()
- + initialise()
- + shutdown()
- + systemRequestedQuit()
- + anotherInstanceStarted()
